◀ Projects

Graphic Designer - *Emergent Solutions*
Designed a digital marketing piece for an upcoming community presentation. Collaborated with stakeholders to consider visual appeal and subject application.

UI Designer - *APiO, Inc*
Designed mockups for new product where telling the story was a supreme importance to client. Worked with CEO & sales to match the style and imagery to the target customer expectations.

UI Designer - *Unboxt*
Created user interface mockups of member pages and mobile views. Company provided further project opportunities after the completion of first successful project. The second project was the redesign of a landing page and further theme work for additional pages.

Graphic Designer - *StrongBod*
PowerPoint slide deck creation with proposed mobile app mockups and theme conceptualization. Recreated logo design to match modern coloring and style.

Web Designer/Developer - *Utah Plastic Surgery Society*
Redesigned an outdated website in functionality, design patterns, and customer persona. Designed simple but clean logo. Used React as the app framework. Finished product was a responsively design static application.

Web Designer/Developer - *Crypto Elevation*
Worked closely with a Full Stack Senior Developer along with close collaboration with the owners and stake holders. Extended the brand through creation of additional pages in a unified design style. Designed a custom dashboard as well as a matrix tree.
